## What is a Website Template?

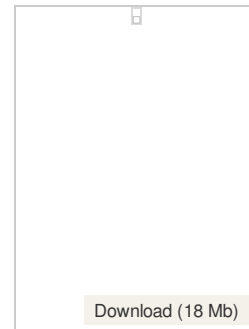

Website Template is presented as the turnkey set of files and schemes in the graphic and text format that is required to set up any kind of website customized to your needs. This is the design of web pages that are easy to change and modify, indeed.

Website Templates sold online are usually edited based on the most demanded HTML-editors, and thus, this is a simple tool for an ordinary user with standard skills to operate it. The web design graphic, based on PSD or Flash, is modified through the program files to

## Examples

PSD or Flash, is modified through the resource files in the template package. On the top of it, the templates include the separate files for the home page and embed site pages which are subject to editing, either. The web design of the Template including the separate files are developed by the qualified professionals, thus the one who buys the Website Template only needs to fill it with the individual content, namely tests, images, pictures, texts, etc.
